RNSIT	2027
Computer Science & Engineering (Cyber Security} 8.0	B.E

Projects

Restaurant Booking Django

- [GitHub Repo](#)
- Built a full-stack restaurant reservation system using Django and MySQL with dynamic time slot filtering, date selection, and duplicate booking prevention logic.
 - Integrated JavaScript Fetch API to render and update available bookings in real-time; submitted as a peer-reviewed final project in Meta’s Full-Stack Developer Coursera program.

Django, MySql, Python, RESTful APIs, Full-stack

MetaLemonBackend

[GitHub Repo](#)

Developed a role-based RESTful API as part of Meta’s API course. Used Django REST Framework and Djoser for authentication, with separate permissions for Managers, Delivery Crew, and Customers. Built endpoints for user management, menu items, cart, and orders. Implemented filtering, pagination, error handling, and token-based authentication.

API, Django

Build an Expense Tracker App in Django

- [GitHub Repository](#)
- Built a web app to manage book distribution expenses with CSV/PDF upload, CRUD features, and Chart.js visualizations.
 - Used Pandas & Camelot for data handling; replaced manual spreadsheets with a secure, user-friendly interface.
- Django, Python, JavaScript

Django Meta Course Project

- [GitHub Repository](#)
- Developed a modular Django app with models, views, templates, and admin panel as part of Meta Back-End specialization.
 - Implemented routing, dynamic rendering, and basic CRUD functionality.
- Django, Python, HTML/CSS
